CONFINDUSTRIA CANAVESE  
Associazione Industriali del Canavese

*On March 3, 2021 Lars Carlstrom – Italtvolt S.p.A. CEO - met Confindustria Canavese's entrepreneurs to present the electric batteries' gigafactory that will be placed in the Scarmagno area in the next few years.*

*We decided to create a survey among our associated in order to build a catalog concerning their companies.*

*Here we are! Out of 320 companies 80 replied by the deadline fixed on 31st March.*

*We are pleased to introduce them in the next pages.*

*Welcome to you and your team Mr Calstrom.*

*Best regards,*

*Cristina Ghiringhello  
Confindustria Canavese (Ivrea) Director*

## Welcome to Canavese, a region rich in nature, history, culture and industry

Canavese covers 2.870 square kilometers where live nearly 374.000 inhabitants in 158 municipalities.

Industrialization in Canavese dates back to the 18th century with hemp weaving mining and forging of farming and cutting tools. In the 1800's press-forging of iron developed significantly. A transformation process that brought an era of mechanical industrialization in Canavese went hand in hand with the industrialization of Italy itself.

Today the industrial system in Canavese includes almost 33.900 companies. The industrial scenario is extremely differentiated, with particular orientation toward the mechanical and electronic sectors. The markets covered by companies in Canavese vary from the supply of advanced technology for large international companies to the production of finished industrial products, to the supply of informatics to the automotive industry.

Industry can be divided into three main sectors: electronics/informatics, press forging of steel and precision mechanics. But we register also the presence of other important sectors such as plastics, buildings, chemistry, agriculture, graphics and editorial services, advanced tertiary industries and, especially in recent years, pharmaceutical and biotechnology.

Press-forging steel is one of the oldest activities in the history of Canavese industry, particularly in the northwest of the region. The market for these companies are manufacturers of automobiles, industrial and earth work vehicles, tractors and other farm equipment and material for locomotives. The companies located in Canavese work the 40% of steel of Italy.

When speaking of industry in Canavese the first company that comes to mind is Olivetti.

Olivetti was founded in 1908 by Camillo Olivetti and immediately took an important part in the Italian industrial scenario, becoming world renowned for its typewriters and calculators. Olivetti begins as a mechanically oriented company and later became an electromechanical and information and communication technology company. Adriano, Camillo's son, established a corporate style and culture that won Olivetti a unique place in Italian and European industrial history.

In 2018 UNESCO has included Ivrea, industrial city of the 20th century in the World Heritage List as important example of 20th-century urban development joining production and architecture, born from the innovative social and cultural project of Adriano Olivetti.

## Confindustria Canavese, home of Entrepreneurs

Confindustria Canavese is the biggest business organization since 1945 in the Canavese land.

Olivetti and eight other companies founded it with the aim of creating a corporate community based on education and welfare. This is the reason why Confindustria Canavese is the association that invests more than other territories in education and training.

We are based in Ivrea and all the industrial and services companies settled in Canavese are welcomed to join us.

Confindustria is the place where entrepreneurs work together to achieve common goals, help each other to grow, doing networking and business matching.

Through the association our companies can play an active role in the most important national business organization: Confindustria.

Confindustria was founded in 1910 as industrial trade association to represent and safeguard the interests of the world of industry.

Today is no longer just that nor can it be deemed to be an expression of what in political jargon are defined as the “strong powers”, namely the leading industrial groups. Indeed, thanks to its increasingly pluralistic configuration and characteristic innovative vocation, its responsibilities regarding the search for a solution to the enormous problems, facing Italy through dialogue and debate with other members of the world of production and employment have grown.

## Cogeis Spa

<b>address</b>	Via XXV Aprile 2/15 - 10010 Quincinetto (TO)
<b>phone</b>	+39 0125 635111
<b>website</b>	www.cogeis.it
<b>total turnover (€)</b>	58.6 M
<b>employees nrs.</b>	270
<b>company main activity</b>	<p>Cogeis Spa is a fully privately-owned company born in Quincinetto (10 km from Ivrea) in 1963. The company has been operating in all aspects of the construction trade: civil and building construction, road works, execution of important underground structures, hydraulic layouts, construction, maintenance and modernisation of hydroelectric systems, environment consolidation and protection. With a 55 years long experience in the construction industry, Cogeis is classified 33rd in the ranking of the top 50 Italian construction companies (“Il Sole 24 ORE”, employs about 270 employees and has a 5 years average turnover of more than €60 million. Cogeis is both medium/big-sized business and a family business. The advantage of being a medium-sized business, is that the company has the know-how, the structure, the skills and the financial strength required to ensure compliance with contracts’ terms and national regulations concerning quality, safety and environment. The advantage of being a family business is that the company executes projects adopting a technical/practical approach, rather than bureaucratic, and quickly answer to clients’ requests and to eventual technical issues. Also, since the prudent management gives attention to efficiency and quality, the personnel and technical resources are efficiently organized to ensure that even complex infrastructures are built at the best price.</p>
<b>goods and services offered</b>	<p>The optimal supply with resources and material is a fundamental condition for the provision of services. To deliver high quality projects on schedule and cost effectively, the company has bought all the suitable equipment needed for carrying out all the works acquired. The group has also built fixed plants in different locations in order to secure the area-wide supply with stone, gravel, asphalt mixture and bitumen emulsions. Cogeis Spa has a general warehouse located in Quassolo (Torino) and a main production plant</p>

located on the banks of the River Dora Baltea, in Borgofranco d'Ivrea (Torino). This production plant consists in a quarry of inert materials, in an inert crushing and screening plant, in a concrete production plant, in a bituminous conglomerate production plant, in a steel processing workshop for R.C, P.R.C. and R.C. manufactured article prefabrication plant, and finally in a mechanical workshop.

Restauration or new construction of Commercial and industrial facilities - Public buildings - Housing Civil works for waste disposal, environmental technology facilities and reconversion plants - Restoration of religious and historical buildings of artistic or architectural interest - Civil works connected to hydroelectric power plants and to Oil & Gas plants - Production of construction material (stone, gravel, asphalt mixture and bitumen emulsions) - Production of precast elements.

#### **certifications**

Cogeis have got the SOA certificate and according to the Italian Law, Cogeis can carry out civil building, road work and tunnelling for an unlimited value. The company has proved compliance to the standards of the following certifications: UNI EN ISO 9001-2015; QS 45001-2018; ISO 14001:2015; SA 8000:2014; ISO 39001:2012; UNI ISO 37001:2016.

The companies apply the CE marking to their products: to inert in conformity with the Construction Products Directive 89/106 CE – EN12620:2003; to their concrete production plants in accordance with the ministerial guidelines in reference to the Ministerial Decree 14 September 2005 “Technical Standards for constructions”; to all their bituminous conglomerates – EN 13043:2004; to its steel elements production in compliance with the EN 1090-1:2009+A1:2011 standards.

Cogeis has authorization to collect demolition materials, bituminous conglomerates and excavated earth and rocks at the site in Borgofranco d'Ivrea (Torino) and authorization to manage a mobile system to collect non-hazardous construction and demolition waste. Cogeis is also registered in the Italian Register of Environmental Operators and has the authorizations for: category 9-C (site remediation), category 10-B (remediation of materials containing asbestos), category 2-B (collection and transport of own waste), category 8-D (intermediation and trading of waste without holding the waste).

## Delta Visione Srl

**address** Via Carlo Spegazzini, 4 - 10010 Bairo (TO)

**phone** +39 0124 501858

**website** [www.deltavisione.com/en](http://www.deltavisione.com/en)

**total turnover (€)** 5.2 M

**employees nrs.** 26

**company main activity** Delta Visione designs and manufactures automated systems designed to meet the ever-increasing requirements of objectification, sorting and traceability of production and integrated systems able to guarantee a constant quality control and total process control.

**goods and services offered** Automatic sorting machine. Delta Visione designs and manufactures automatic sorting machines capable of controlling every single item of a series production, identifying and discarding non-compliant ones and thus guaranteeing quality control over 100% of production. • Marking. In every industrial sector it is increasingly crucial to have adequate traceability processes, and these require effective marking systems. In this field, Delta Visione has consolidated over time a high level of know-how and is able to provide complete solutions, both through systems customized to the specific needs of the customer and through standard machines that are versatile and easy to use. • Traceability. Delta Visione realizes systems designed to track all the important stages of a complex industrial process. The versatility of the system allows integrating additional functions aimed at the preventive maintenance of the plants, the management of machine downtime, the internal and external logistics of the company. • Machine vision. Each system is unique and totally customized: after listening attentively to customer requests and having carefully designed the most suitable project to meet them, what makes the difference is the possibility to select - without brand constraints - the most suitable and avant-garde components present on the market, which are then combined with a constantly evolving proprietary standard software platform.

**certifications** ISO 9001:2015.

## Sharport Srl

<b>address</b>	Piazza Mascagni, 9 - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 280613
<b>website</b>	www.sharport.net
<b>total turnover (€)</b>	0.25 M
<b>employees nrs.</b>	4
<b>company main activity</b>	For 25 years Sharport has been supporting companies with tailor-made and cutting-edge technologies (.NET and NET Core framework) in the area of cloud business software to ensure a sustainable digitalisation process with satisfying and long-lasting results. The knowledge gained over the years through corporate and operational participation in major IT companies and IBM world improved our customer needs analysis, development and project management skills in several sectors (e.g. manufacturing, automotive, e-mobility, series production, wholesale and services). Sharport, with its OpenG, especially focused on Accounting&Finance, is the Italian partner of Asseco Solutions, among the top 6 European software companies. Thanks to this partnership Sharport can offer a fully integrated ERP solution, including modules like PLM/PDM, DMS, BI, APS.
<b>goods and services offered</b>	APplus is one of the most popular ERP software due to its innovative approach to process digitalisation and the implementation of 4.0 technologies: since 2014 it has been awarded the “ERP System of the Year” in automotive, Industry 4.0 and series production categories by the University of Potsdam. Being fully integrated and developed on processes, it is adaptable to any reality and allows the “circular management of information” that enables the operator to access all related information in any business process. It is a simple and intuitive management software that allows companies to keep up-to-date with the times as it has innovation in its DNA: 1994 1st ERP based on Windows, 2000 1st ERP based on browser, 2019 1st ERP with Artificial Intelligence. We support companies from the definition of needs to the actual implementation of the tailor-made solutions, as well as technical implementation and employee training.
<b>certifications</b>	None.

## M.C.T. Srl

<b>address</b>	Via Cavour 31 - 10014 Caluso (TO)
<b>phone</b>	+39 011 9897974
<b>website</b>	www.mctcaluso.com
<b>total turnover (€)</b>	3 M
<b>employees nrs.</b>	29
<b>company main activity</b>	M.C.T. s.r.l. is specialized in design, injection mould-making, thermoplastic moulding, assembly work and final quality control.
<b>goods and services offered</b>	Our principle customers work in electronics, parapharmaceutical, mechanic, IT field and automotive. We offer complete service from the idea to the final product. We are also able to offer dimensional report and mould flow.
<b>certifications</b>	ISO 9001:2015. The company will be certificated ISO 45000 at the end of the year.
<b>contact person</b>	Daniela Actis Dato <b>t.</b> +39 328 0016969 <b>e.</b> daniela@mctcaluso.com

## Matrix Spa

<b>address</b>	Corso Vercelli, 330 - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 615442
<b>website</b>	www.matrix.to.it
<b>total turnover (€)</b>	12.5 M
<b>employees nrs.</b>	100
<b>company main activity</b>	<p>Since its establishment in 1988 Matrix rapidly became one of Europe's leading advanced mechatronic components manufacturers in several branches with the following main divisions: Automotive, Pneumatic and Textile.</p> <p>Matrix Automotive Division develops, produces and markets alternative fuel (CNG-LNG, LPG, H2, etc.) engine components (injectors, reducers, filters, etc.). Partner-Supplier of Automotive OEMs and EMS integrators, worldwide significantly present in the major markets where applications and technologies of alternative fuels are involved.</p> <p>Matrix Pneumatic Division develops, produces and markets pneumatic solenoid valves and pressure reducers, for machine and industrial automation.</p> <p>Matrix Textile Division develops, produces and markets a vast and complete range of selection boxes, all of which are characterized by their extreme modularity and adaptability to all types of textile machines (linear and circular knitting machines: small/hosiery, medium/seamless and big/fabric diameter).</p>
<b>goods and services offered</b>	<p>Matrix develops, produces and markets, on a proper and patented technology, mechatronic components: custom solutions for Automotive, Pneumatic and Textile branches.</p> <p>Matrix Automotive Div. Products: injectors for gaseous alternative fuels (HD - multiple injectors rail, HS - single injector for independent use or for UDM - Universal Direct Mounting on vehicle intake manifold, KJ - injectors for heavy duty and dual fuel applications), filters (XF - CNG/LPG coalescence gaseous filtration system) and PCD - Pressure Control Device (NX - CNG Pressure Reducer).</p> <p>Matrix Pneumatic Div. Products: solenoid valves (2/2, 3/2, 5/2 - NO or NC - On/Off or Pick &amp; Hold - 12/24/... Volt) and pressure reducers (digital and analog); for applications with high speed or proportional air jets.</p>

Matrix Textile Div. Products: selector boxes that thanks to compactness and performances, offered by Matrix innovative piezo-ceramic technology, grant high speeds and precision in actuation and a remarkable saving of energy.

**certifications** ISO 9001:2015 (Matrix - Whole Company).  
IATF 16949:2016 (Matrix Automotive Division).

## Mecs Snc

<b>address</b>	Corso Vercelli, 125/A - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 1960046
<b>website</b>	www.mecs-meccanicadp.it
<b>total turnover (€)</b>	1.3 M
<b>employees nrs.</b>	13
<b>company main activity</b>	MECS snc is a small 4.0 company, that produces precision mechanical components, also for multinational and international customers. Specialized in mechanical pieces for the banking and industrial automation sector, it is also operating in other fields such as mechatronics, earthmoving, motorcycling, sport equipment, medical sector, security, energy (from 2011 to 2017 we produced metallic parts for the first lithium batteries, intended for motorcycles and water taxis for Venice) and others. With the partnership of our HUB22 Mechatronics business network, we are also able to design and develop softwares and smart solutions, to produce electronical devices and industrial machines, and to offer advisories and training services.
<b>goods and services offered</b>	Prototyping and small and medium productions are our daily work, but we can also deal with small assembly, refine designs and engineer products. Our high-quality precision components are turned and milled parts, made in different materials: high speed steel, non-ferrous alloys such as copper and bronze, exotic alloys such as titanium and light alloys like aluminium. We are also specialized in the processing of stainless steel, alloy steel, copper and plastic materials like derlin. Thanks to the support of our partners, we can supply finished products, which have undergone heat treatment or galvanic ones, such as zinc and nickel-coating, bluing or which have been fitted.
<b>certifications</b>	We are close to obtain ISO 9001:2015 quality certification.
<b>contact person</b>	Rossella Paccapelo <b>t.</b> +39 0125 1960046 <b>e.</b> r.paccapelo@mecs-meccanicadp.it

## Nanchino Automazioni Industriali Srl

<b>address</b>	Via Nazionale, 80 - 10010 Mercenasco (TO)
<b>phone</b>	+39 0125 710267
<b>website</b>	www.nanchino.it
<b>total turnover (€)</b>	15 M
<b>employees nrs.</b>	50
<b>company main activity</b>	Nanchino is a family ownership company, founded in 1946 and located near Turin (5 km from the former Olivetti production site). The company has 40 years of experience in Industrial Automation and has become leader in supplying turnkey solutions for automated production lines. Today, our core business is the design and construction of fully automated assembly and testing lines. Our main customers are: ABB, Bosch, Brembo, Denso, Endurance, ITT, Marelli, Stellantis, Valeo. We currently have lines running worldwide. Thanks to the 6.000 m2 covered space, we manage different projects at the same time. A total of 55 employees are working in the following departments: Sales, Pre-project, Design (Mechanical, Electric & Pneumatic, SW), Purchasing, Production, Service and Maintenance. The average turnover is around 15 million Euro per year. Nanchino is focused on customers' needs and is committed to new challenges and opportunities.
<b>goods and services offered</b>	Nanchino offers turnkey solutions for automated production lines. We manage the complete automated manufacturing process of a component, testing and packaging included. Our Technicians and Engineers are committed from the feasibility analysis to the design, construction and installation, till the start-up and Service and Maintenance support. Some typical equipment made by Nanchino are: • Robotic cells • Testing stations • Turning tables • Conveyor systems • Control vision systems • Loading and unloading systems • Full automated / Semi automated assembly lines.
<b>certifications</b>	As European Union requested "Direttiva Macchine 2006/42/CE".
<b>contact person</b>	Nanchino Fabrizio <b>t.</b> +39 0125 710267 <b>e.</b> fabrizio@nanchino.it

## O.M.O. Srl Officine Meccaniche Occleppo

<b>address</b>	Via Torino, 603 - Fraz. S. Bernardo d'Ivrea - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 631416; +39 0125 234762
<b>website</b>	www.omo-srl.it
<b>total turnover (€)</b>	1.1 M
<b>employees nrs.</b>	13
<b>company main activity</b>	<p>O.M.O. Officine Meccaniche Occleppo Srl, was founded in 1943 under the name of Officina Meccanica Occleppo Serafino, father of the current CEO Umberto. In its evolution then it became O.M.O. Snc and finally with the current name. For over 60 years we have been manufacturing high precision mechanical designs and specifications of our customers. We realize tool holders and other machines parts for machine tools with numerical control constructors. To the textile sector we supply spare parts of machines (shafts, gears, bearings, assemblies). For pharmaceutical industry we manufacture special machines complete with electrical and hydraulic system. In the last 20 years we have specialized in the design and construction of test benches and assembly benches for the automotive industry.</p>
<b>goods and services offered</b>	<p>Mechanical machining with traditional and CNC machine tools. • Design and construction of test benches for mechanical components. • Design and construction of assembly lines. • Production and marketing of sheet metal works for tinsmithery. • Marketing of industrial paints (metal, plastic, composite materials and floors).</p>
<b>certifications</b>	ISO 9001:2008.
<b>contact person</b>	Andrea Occleppo <b>t.</b> +39 0125 631416; +39 366 6897451 <b>e.</b> commerciale@omo-srl.it

## OSAI Automation System Spa

<b>address</b>	Via Cartiera, 4 - 10010 Parella (TO)
<b>phone</b>	+39 0125 668311
<b>website</b>	www.osai-as.com
<b>total turnover (€)</b>	36 M
<b>employees nrs.</b>	183
<b>company main activity</b>	<p>OSAI Automation System S.p.A. is a global player for the design and construction of machines and systems/lines for automatic assembly and testing. The Company's customer base is made up of multinational Companies operating in different sectors (semiconductor producers, integrated electronic systems, automotive components and medical equipment). Export sales represents more than 85% of the total annual turnover. OSAI was established in 1991 and is listed on the Italian Stock Exchange market (AIM) since November 2020. The Company operates through (i) headquarter located in Parella (Ivrea), with a production area of more than 6.500 s.m., (ii) three subsidiaries (China, Germany and U.S.A.), (iii) distributors / sales representatives and service partners worldwide and (iv) production partners in China and North America. OSAI's product portfolio ranges from standard systems to fully customized turnkey solutions for assembly and testing of high-tech components for the semiconductor industry, the automotive industry and electronics manufacturing.</p>
<b>goods and services offered</b>	<p>OSAI A.S. S.p.A. is a solution provider of high-tech, versatile, reliable and flexible solutions. OSAI operates through 4 divisions, which are deeply interconnected:</p> <ol style="list-style-type: none"><li>1. Automation&amp;Robotics: automated assembly lines and systems for small and medium-sized components with high strategic value, through the development of ad hoc solutions for a wide range of sectors ( i.e. advanced mobility , automotive, home consumers, medical);</li><li>2. Electronics: machines and systems for Laser Marking, Depaneling (either Mechanical or Laser) and Assembly;</li><li>3. Semiconductors: testing lines for semiconductors and MEMS sensors, as well as power module test systems and burn-in automation;</li><li>4. Laser : industrial applications for laser cutting, welding, and marking for plastic and metal components. In addition, the Company can rely on in-house After Sales services.</li></ol>

- certifications** A) Company Certifications: • ISO 9001-2015 Quality • ISO 14001 • 2015 Environment.  
B) Products Certifications (EU): • 2006/42/CE Machine Directive • 2006/95/CE Low voltage Directive • 2004/108/CE Electromagnetic Compliance Directive • 2002/95/CE ROHS Directive.  
C) Product Certifications (UL/FDA): • CEC /2015 Canadian Electrical Code - UL 508 2014/01/13 Industrial Control Panels • CSA C222 No.14 issued on 2013/03/01 Industrial Control Equipment • CDRH ( Center for Devices and Radiological Health) Acknowledgement for laser marking machines exported in the USA ; CDRH is part of the FED ( US Federal and Drug Administration).

## OMBI Srl

<b>address</b>	Strada per Carrone, 30 - 10019 Strambino (TO)
<b>phone</b>	+39 0125 639370
<b>website</b>	www.ombi.it
<b>total turnover (€)</b>	6 M
<b>employees nrs.</b>	63
<b>company main activity</b>	<p>OMBI machines and components specialist since 1946. The company operates with the utmost professionalism and technical expertise in the connectors, precision mechanics, jewelry and medical sectors. OMBI manage the entire production process from design, development, production and testing of machines and parts. We are located in an area of 20,000 m<sup>2</sup> with a plant of 3,000 m<sup>2</sup>.</p> <p>OMBI organization: • Sales and Customer care dep • R&amp;D and Designing dep, equipped for 3D design and FEM analysis • Production dep, provided with more than 30 CNC machines and automatic machining centers for high-accuracy components manufacturing. In addition High-speed machining centers, EDM machines and grinding machines for micro-mechanical parts • QC dep, for constant quality control with Zeiss 3D advanced measurement systems. Possibility of issuing certified quality reports.</p>
<b>goods and services offered</b>	<p>OMBI is a reliable partner with a wide range of products and services. They are mainly divided for the following sectors: • Multi connectors: design and development of modular connectors for electro sources ( signals and power ) and fluids ( pneumatic, hydraulic, lubrication, etc ) • Precision mechanics: production of high precision mechanical components, tooling, automation systems. Manufacturing of micro-mechanical parts • Jewelry sector: chain making machines manufacturing and distribution • Medical sector: radiopaque platinum markers for endovascular stents production.</p>
<b>certifications</b>	ISO 9001.
<b>contact person</b>	Valentina Montanaro <b>t.</b> +39 0125 639370; +39 349 5421145 <b>e.</b> ombi@ombi.it

<b>company main activity</b>	A Tier 2 Company since 1969 located in the north of Ital. Projecting and manufacturing of 1K, 2k and 3K injection moulds in inhouse toolshoop of almost 1000 sqm. Highly skilled in IML over-moulding technology. Core business in mass production of technical as well as aesthetic components for the automotive field, especially interiors. Moulding Department with injection machines up to 300 tons. Surface finishes such as painting, chrome-plating, chrome like painting, metallization, PVD and laser etching and sub-assembling of components.
<b>goods and services offered</b>	Design and manufacturing of 1K, 2K, 3K injection moulds and dies for metal sheet Mass production of technical and aesthetical parts for automotive sectors.
<b>certifications</b>	ISO 9001:2015; IATF16949:2016.
<b>contact person</b>	Barbara Gallo <b>t.</b> +39 335 7328258 <b>e.</b> barbara.gallo@progind.it

## R.B. di Bollero Roberto

<b>address</b>	Strada Ceretti 24 - 10083 Favria (TO)
<b>phone</b>	+39 0124 34131
<b>website</b>	
<b>total turnover (€)</b>	1 M
<b>employees nrs.</b>	8
<b>company main activity</b>	Mechanical Works.
<b>goods and services offered</b>	Mechanical Parts.
<b>certifications</b>	UNI EN 9001.
<b>contact person</b>	Roberto Bollero <b>t.</b> +39 347 8993961 <b>e.</b> rb.bollero@virgilio.it

## Robson Srl

<b>address</b>	C.so Vercelli 125 A - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 798921
<b>website</b>	www.robson.it
<b>total turnover (€)</b>	0.2 M
<b>employees nrs.</b>	3
<b>company main activity</b>	Robson is a small company located in Ivrea operating in the field of industrial test automation, mainly in electronic measurement, product testing and data collection for real-time analysis. Robson is co-founder of the HUB22 Mechatronics business network ( <a href="http://hub22.net/en/">http://hub22.net/en/</a> ) wherewith the collaboration of the other partners, and starting from the analysis of functional features and testing specifications, designs turnkey electronic equipment. We deal with the creation of the complete mechatronic system including the development of software applications, the assembly of the parts, and the installation on-the machine or in the test laboratory. We offer Grimmy Technology, our own IoT solution ( <a href="https://grimmy-technology.com/en/index.php">https://grimmy-technology.com/en/index.php</a> ) where real things and places interact with the surrounding world transferring data and information through the internet. This technology is composed of intelligent hardware gateways and a Cloud infrastructure provided with standard software interfaces for easy integration with customer IT systems.
<b>goods and services offered</b>	With the partnership in the HUB22 Mechatronics business network, we offer the design and manufacturing service for electronic automation test equipment for production plants and quality control laboratories. Recently, after the first Covid-19 lockdown, we reused our own IoT and Cloud technologies to design Sanyapp ( <a href="https://sanyapp.com/">https://sanyapp.com/</a> ) the new mobile application, distributed as a service (SaaS) that helps sanitization operators, managers, and controllers, doing daily activities in the respect of the pandemic government law. This idea was covered by the Italian patent request at 102020000025003.
<b>certifications</b>	None.
<b>contact person</b>	Roberto Bergò <b>t.</b> +39 348 263 0796 <b>e.</b> roberto.bergo@robson.it

## Sacel Group Srl

<b>address</b>	Località Risera - 10080 Ozegna (TO)
<b>phone</b>	+39 0124 424077; +39 0124 424077
<b>website</b>	www.sacelgroup.com
<b>total turnover (€)</b>	27 M
<b>employees nrs.</b>	250
<b>company main activity</b>	Sacel has his head quarter in Italy (Canavese) but has some plants in est Europe and Mexico. Sacel designs its tools, moulds and automations for its production of metal stamped parts (included cupper and its alloy), injected or overmoulded plastic parts and assembled parts. Sacel already produce bus bar (only stamped or overmoulded), electrical connector on customer design, but our R&D likes to start to work with customer from product design to obtain the final purpose to have a best design of the component for their functionality and to optimize the production process.
<b>goods and services offered</b>	Metal stamped parts (steel, cupper, aluminium, titanium, ect.) throught progressive dies technology. Technical injected plastic. Overmoulded parts (eg.: connectors, bus bars, ect.). Assembled parts. The add value of Sacel is that you have just one company to contact for the tools maker, the metal and plastic technology.
<b>certifications</b>	IATF and ISO14001.
<b>contact person</b>	Enzo Sabato <b>t.</b> +39 335 1023580 <b>e.</b> e.sabato@sacel.it

## Sinterloy Srl

<b>address</b>	Via Bairo, 6 - 10081 Castellamonte (TO)
<b>phone</b>	+39 0124 515195; +39 0124 582696
<b>website</b>	www.sinterloy.it
<b>total turnover (€)</b>	3.4 M
<b>employees nrs.</b>	27
<b>company main activity</b>	Sinterloy is a company leader in hard metals production. Since 1959 Sinterloy produces hard metal particulars mainly composed of tungsten carbide and cobalt. Such products are obtained with processes of powder metallurgy through sintering thermal cycles. Our production is composed of pieces made on client's drawing which can be both raw or grinded, for which we make the study, the project and the realization, according to the particular requirements of the end user, "from powder to taylor-made product".
<b>goods and services offered</b>	Our technology and our know-how allow us to cover a range of production from less than 1 gram to around 40 kilograms. Our products find employment as wear parts for industry in many sectors: general mechanical engineering, textile, abrasives, automotive, food and chemical industry, nuclear, paper, tobacco and packaging.
<b>certifications</b>	UNI EN ISO 9001:2015.
<b>contact person</b>	Geminiani Augusto <b>t.</b> 0124 515195 <b>e.</b> <a href="mailto:augusto.geminiani@sinterloy.it">augusto.geminiani@sinterloy.it</a>

## SM System Srl

<b>address</b>	Strada Preie, sn - 10010 Torre Canavese (TO)
<b>phone</b>	+39 0124 423126
<b>website</b>	www.sm-system.it
<b>total turnover (€)</b>	9.5 M
<b>employees nrs.</b>	50
<b>company main activity</b>	<p>SM System Srl was founded in 2001 with the purpose of designing and building production LASER systems for welding, cutting, surface treatments, micro-machining and marking for multiple industrial sectors. After just a few years they also added industrial component assembly plants to their laser technology work. Today, in addition to designing and building Laser and ASSEMBLY plants, SM System has reinforced and widened its range of solutions with TESTING systems for line final testing. SM System's capacity for evolution allows them to offer their customers a top level research and development consulting service, specialised and ready for any need which may arise. The motivating elements for the SM System team are listening and innovation with the purpose of sustaining and pursuing a technology which is strongly future-oriented. In 2004 SM System Srl obtained UNI EN ISO 9001 (as amended and updated) certification. This recognition confirms SM System's commitment to the constant improvement of product quality and customer service.</p>
<b>goods and services offered</b>	Design, engineering, construction and commissioning of automation technologies, laser processes and testing machines.
<b>certifications</b>	UNI EN ISO 9001.
<b>contact person</b>	Marco Crudeli <b>t.</b> +39 0124 423126 <b>e.</b> m.crudeli@sm-system.it

## Tecnau Srl

<b>address</b>	Via Torino, 603 - Fraz. San Bernardo d'Ivrea - 10015 Ivrea (TO)
<b>phone</b>	+39 0125 631678
<b>website</b>	www.tecnau.com
<b>total turnover (€)</b>	52 M
<b>employees nrs.</b>	230
<b>company main activity</b>	We are a multinational corporation with operations in Italy (Ivrea), Sweden (Ljungby) and Unites States (Billerica, MA). We operate in the field of industrial automation and design, produce and supply automated production lines in different fields and industries. Our know-how includes mechanical, electrical and software design, manufacturing and quality assurance, project management. We offer standard production lines, primarily targeted to the digital print industry, however our history and background in industrial automation opens the door to customized solutions to support specific requests. During our 30-year experience we developed and produced production systems for the food industry (dried tomatoes production line), print industry (e.g. book on demand), high security production lines for Mints (coin rolls assembly lines), automotive industry (quality control, packing and palletizing of car plates).
<b>goods and services offered</b>	Industrial automation, including custom design (mechanical, electrical and software), production, installation and service support. • Project management and integration of third party's devices, such as robots (collaborative, cooperative, industrial) • Quality control systems (Tecnau proprietary solution, Datalogic, Cognex, others) • Data matching and validation (via D-Matric, Bar Codes) • Data tracking and reporting solutions (TecnauConnect proprietary software) • Line performance (OEE-Overall equipment Effectiveness, operating performance, service performance, ...). Our solutions are designed to operate in 24/7 production environments and we offer direct service support. Our lines are compliant to the most modern standard (Industry 4.0) enabling remote support, data collection and diagnostic.
<b>certifications</b>	ISO 9001:2015.
<b>contact person</b>	Stefano De Marco <b>t.</b> +39 349 7743860 <b>e.</b> sdemarco@tecnau.com

## Vertmonde Srl

<b>address</b>	Strada Bredda, 25Q - 10012 Bollengo (TO)
<b>phone</b>	+39 0125 1892844
<b>website</b>	www.vertmonde.it
<b>total turnover (€)</b>	1.5M
<b>employees nrs.</b>	12 (employees and collaborators)
<b>company main activity</b>	Vertmonde has been designing, producing and distributing innovative lighting solutions since 2004 and in 2007 began developing luminaires using LED technology. Innovation in designing products for specific fields of application is the fundamental condition which enables us to provide highly distinctive solutions compared to the all-purpose mainstream products. By investing in the top technology, constantly choosing the best and most up to date light sources and the most reliable and sophisticated power supplies, over time we have been able to develop functionally efficient and yet always pleasing luminaire design, winning the trust of some of the most prestigious companies in the world and becoming not only supplier but technological partner. Our “general contractor” approach makes us able to manage the whole process, from the design of the new lighting lines to the installation and testing, providing “key in hands” solutions to the customer.
<b>goods and services offered</b>	Dismantling of existing lighting power lines • Disposal of obsolete lighting fixtures • Design of new lighting power lines • Lighting layout design • Supply of lighting products • Installation of new lines, lighting fixtures and testing • Design of UVC sanitation systems for common areas • Supply of proprietary UVC sanitation devices. Interest: development of batteries for street lighting, public and private, with supplementary power supply for photovoltaic panels.
<b>certifications</b>	Vertmonde luminaires conform to the mandatory EC-ENEC directives and are compliant with European harmonized standards. Additional voluntary certifications have been obtained by Vertmonde luminaires, awarded by the foremost European and north American safety institutes such as UL, SAA, TÜV, DLC, RoHs, etc.
